

Rank									
1	Miscalculation Bug	As an election official I want the elections regardless of candidate count or number of voters to produce correct results							
	Acceptance criteria:	Passes tests when calculating results of elections with large (i.e > 20) number of candidates and number of voters (i.e. > 100,000)							
	Definition of Done:	Regression testing passed, approved by team, passes testing acceptance criteria items, demonstrable product							
	Effort:	Low							
	PBI Authors:	Zaid Nolley, Zach Ross
